European Journal of Operational Research 58 (1992) 431–432
North-Holland

Contents Volume 58

Feature Issue on Warehouse Design and Operation

1 Editorial
L.F. Gelders
3 A review of warehouse models
G. Cormier and E.A. Gunn
14 Design and operation of an order-consolidation warehouse: Models and application
A.E. Gray, U.S. Karmarkar and A. Seidmann
37 Zone shapes in class based storage and multicommand order picking when storage/retrieval machines are used
M. Guenov and R. Raeside
48 Storage layout of AS/RS racks based on recurrent orders
D.L. van Oudheusden and W. Zhu
57 Order batching procedures
D.R. Gibson and G.P. Sharp

68 Setup cost stability region for the dynamic lot sizing problem with backlogging
S. Chand and J. Vörös
78 Asymptotic analysis of dichotomous search with search and travel costs
R. Hassin and R. Hotovely
90 A fuzzy set-theoretic method for public facility location
K.-h. Chung and D.-w. Tcha
99 Multi-item batching heuristics for minimization of queueing delays
U.S. Karmarkar, S. Kekre and S. Kekre
112 Optimal preventive maintenance policies in an M/G/1 queue-like production system
L.-F. Hsu
123 Queueing models for performance analysis: Selection of single station models
M.C. Springer and P.K. Makens

Special Issue on Practical Combinatorial Optimization

147 Editorial
R.D. Galvão, S.K. Jacobsen, N. Maculan and F. Maffioli
149 Topological design of computer communication networks – The overall design problem
B. Gavish
173 Production scheduling problems in a textile industry
P. Serafini and M.G. Speranza
191 Sequencing offshore oil and gas fields under uncertainty
K.O. Jørnsten
202 Location and sizing of offshore platforms for oil exploration
P. Hansen, E. de Luna Pedrosa Filho and C. Carneiro Ribeiro
215 Branch-and-bound algorithms for the multi-product assembly line balancing problem
I. Berger, J.-M. Bourjolly and G. Laporte
223 Random pseudo-polynomial algorithms for some combinatorial programming problems
G. Galbiati and F. Maffioli
236 Reformulating nonlinear combinatorial optimization problems for higher computational efficiency
M. Oral and O. Kettani
250 A Lagrangean heuristic for the p_k-median dynamic location problem
R. Diéguez Galvão and E. del R. Santibañez-Gonzalez
263 An and–or-graph approach for two-dimensional cutting problems
R.N. Morabito, M.N. Arenales and V.F. Arcaro
272 A heuristic procedure for the crew rostering problem
L. Bianco, M. Bielli, A. Mingozzi, S. Ricciardelli and M. Spadoni
284 A heuristic for Euclidean and rectilinear Steiner problems
J.E. Beasley
293 Enhancing an algorithm for set covering problems
J.E. Beasley and K. Jørnsten

301 Maintenance management decision making (*Invited Review*)
L.M. Pintelon and L.F. Gelders
318 Development of a reliability based dynamic dredging decision model
S.J. Ratick, W. Du and D.A. Moser
335 Number of bids, number of bidders and bidding behavior in outer-continental shelf oil lease auction markets
R. Saidi and J.R. Marsden
344 Time-series distributional properties of financial ratios: Empirical evidence from Finnish listed firms
T. Martikainen
356 Reorganization of forest districts via efficiency measurement
C. Kao and Y.C. Yang
363 A branch-and-bound algorithm for the location of facilities causing atmospheric pollution
J. Karkazis and C. Papadimitriou
374 A model for scheduling postal distribution employees
M.K. Malhotra, L.P. Ritzman, W.C. Benton and G. Keong Leong
386 Optimization of telephone wire gauges for transmission standards
L.F. Hernandez and B. Khoshnevis
393 A cost-allocation system applied to Dutch hospitals
P.A. Verheyen and P.F.P.M. Nederstigt
404 Some new efficient methods to solve the $n/1/r_i/\sum T_i$ scheduling problem
C. Chu and M.-C. Portmann
414 An optimal method for solving the (generalized) multi-Weber problem
K.E. Rosing
427 Democracy and efficiency: A note on "Arrow's theorem is not a surprising result"
D. Bouyssou
431 Contents Volume 58
